ADI AUSTEYR A1/A2
Designed to achieve battlespace dominance

The ADI AUSTEYR A1/A2 has been developed by ADI to conform to the stringent design parameters of the Australian Defence Force (ADF). The AUSTEYR A1/A2 is manufactured at ADI’s Lithgow light engineering facility and is currently in service with the ADF as its preferred individual combat weapon. The ADI AUSTEYR A1/A2 has achieved international success with defence forces and within special forces organisations worldwide as an individual combat weapon.

**Designed for combat effectiveness**

The ADI AUSTEYR A1/A2 is designed to ensure battlespace dominance with fast target acquisition combined with a high cyclic rate of fire and high level accuracy for effective firepower. The ADI AUSTEYR A1/A2 utilises a bullpup design as part of its six component modular construction.

The ADI AUSTEYR A1/A2 is perfectly balanced with very little recoil and is optimised for the firer.

The ADI AUSTEYR A1/A2 incorporates a cold forged, chrome lined barrel with a 1 in 7 in twist or 1 in 9 in twist. The ADI AUSTEYR A1/A2 utilises high impact glass fibre reinforced polymers that are lightweight and resistant to the effects of heat, humidity, moisture and sand.

The integrated optical sight enhances the firer’s view and assists with target acquisition in low light conditions.

The ADI AUSTEYR A1/A2 has proven itself to be an operationally effective weapon system.

**Designed for operational reliability**

The ADI AUSTEYR A1/A2 is designed and manufactured to stringent Australian and international quality standards ISO 9002. The high reliability and maintainability of the ADI AUSTEYR A1/A2 ensures superior operational effectiveness, longer service life and lower through life costs.

Precision casting ensures high dimensional accuracy and surface finish.

As a result of the design and long-term accuracy of the ADI AUSTEYR A1/A2, defence forces worldwide are enjoying significant savings in both individual and collective training costs associated with maintenance of proficiency with the rifle.

**Function**

The ADI AUSTEYR A1/A2 is designed to function with 5.56mm F1 ball (SS109) ammunition and 5.56mm F3 blank ammunition when fitted with the appropriate blank firing attachment. The ADI AUSTEYR A1/A2 is optimised for use by the ADF.

**Characteristics**

The ADI AUSTEYR A1/A2 exhibits the following nominal characteristics:

- **Barrel length**
  - 508mm (assault rifle)
  - 407mm (carbine)
- **Accuracy**
  - 60mm at 50m (5 round group)
- **Integrated optical sight**
  - 1.5 magnification
- **Magazine capacity**
  - 30 rounds
- **Cyclic rate of fire**
  - 680-850 (per min)
- **Effective range**
  - 400m
- **Weight (unloaded)**
  - 3.6kg

**Enhanced Steyr**

ADI is currently developing a modular enhanced version of the ADI AUSTEYR A2. This weapon will incorporate a Picottiny rail for the fitment of legacy systems such as the M203 P1 40mm GLA as well as COTS sighting and numerous additional battle enhancement accessories.
